Hi John,

Are you on the cheapest available Momentum Energy electricity plan?

Moving forward, we are going to tell you if you're on our cheapest generally available energy plan on your electricity bills and on any notices we send you about changes to your energy prices or plan benefits.

In the meantime, we've looked into your energy account, and here's what we've found.

Could you save money on another plan?

Based on your past usage, our Smile Power Flexi plan may cost you up to \$145 (GST incl) less per year than your current plan.* To switch to this plan for your future energy needs, go to momentumenergy.com.au/productswitch.#

We're here to help,

The Momentum team

* This estimate is based solely on rates and charges under our plans and excludes the value of benefits other than discounted rates. The estimate will vary if you use more or less electricity, if our rates change or if you move to a different tariff type. # Plan starts from sign up (rates cannot be applied retrospectively).
